

# Installation d'un serveur AD-DS sur Windows Server 2025

L'installation d'un serveur AD pour un nouveau domaine se fait en deux parties L'installation du service AD DS et la configuration du contrôleur de domaine.

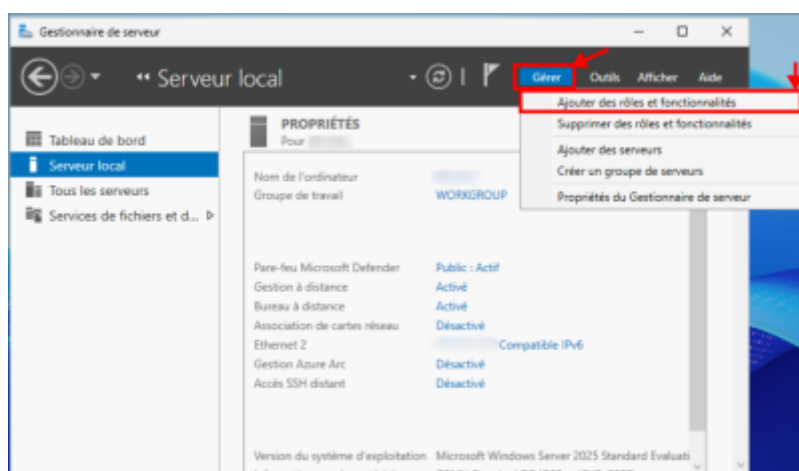

À noter que cette procédure est pour Windows Server avec l'environnement de bureau.

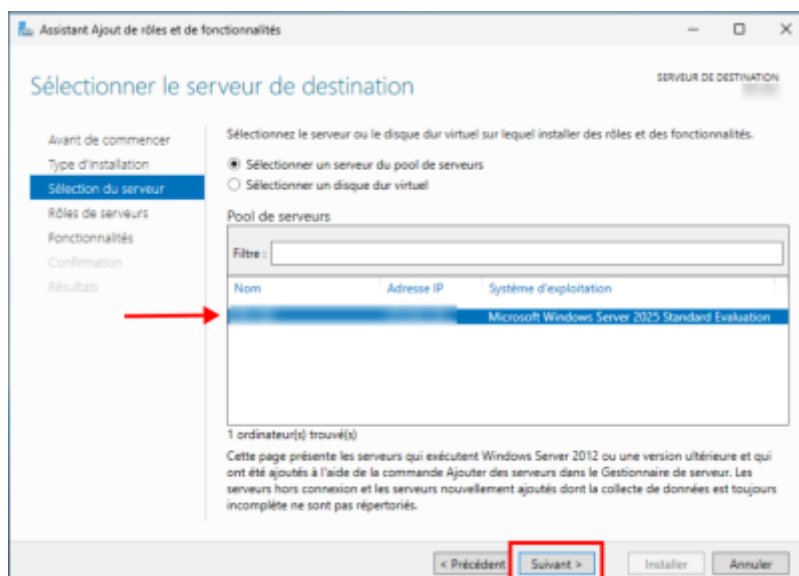

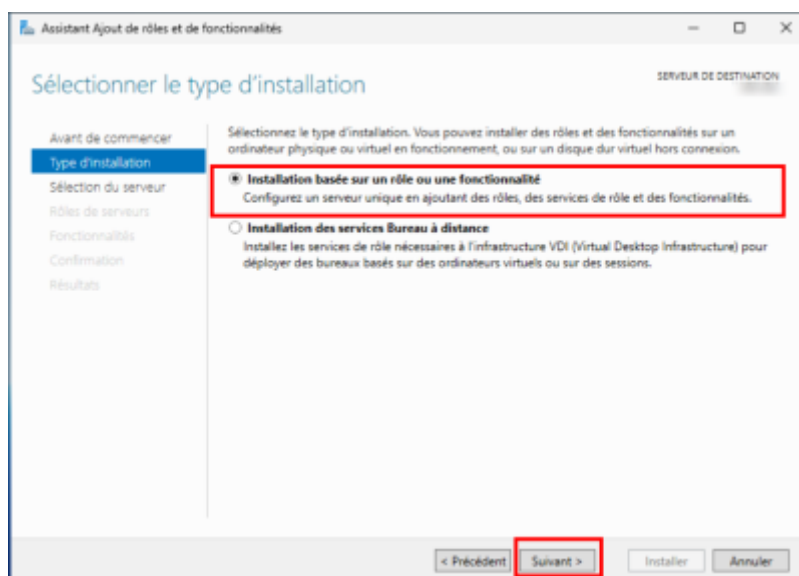

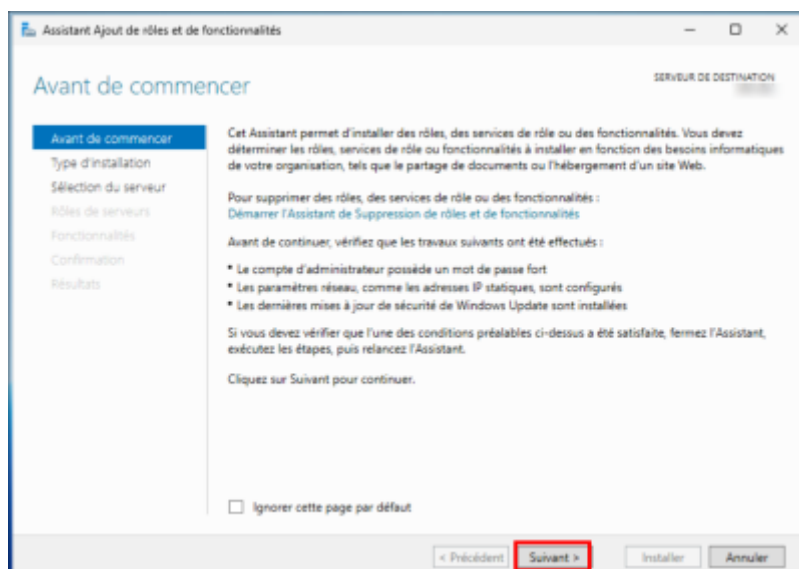

## Prérequis :

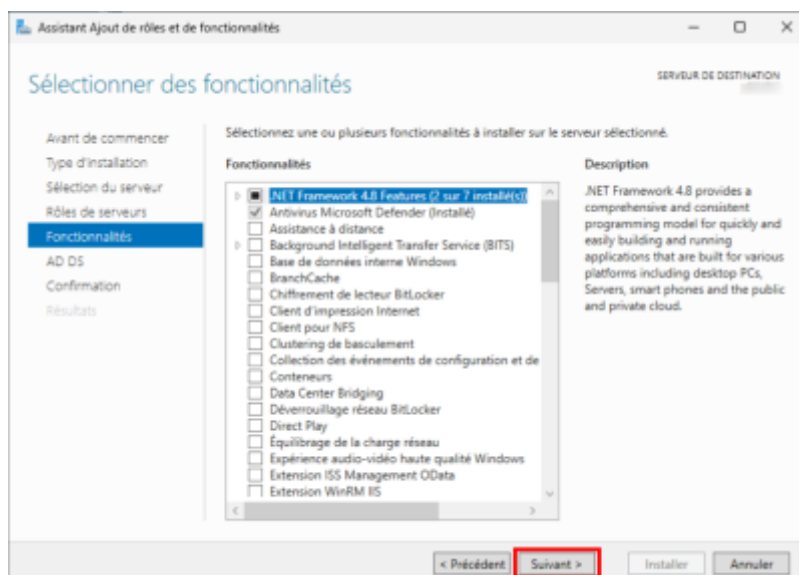

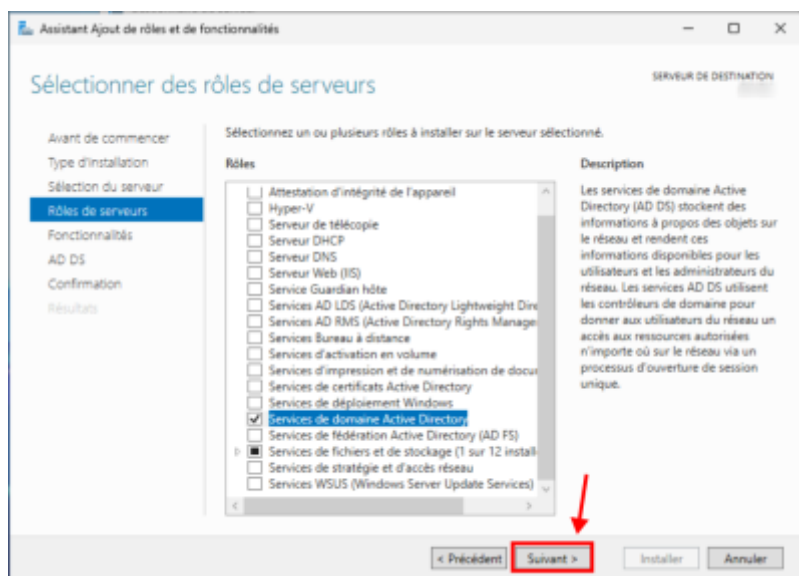

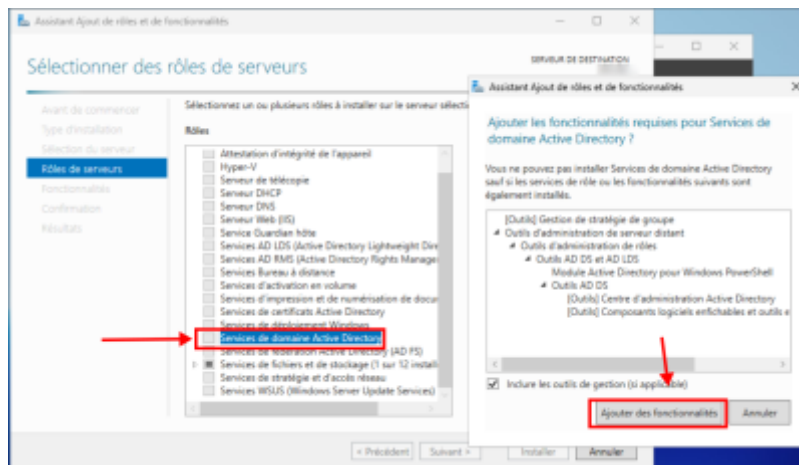

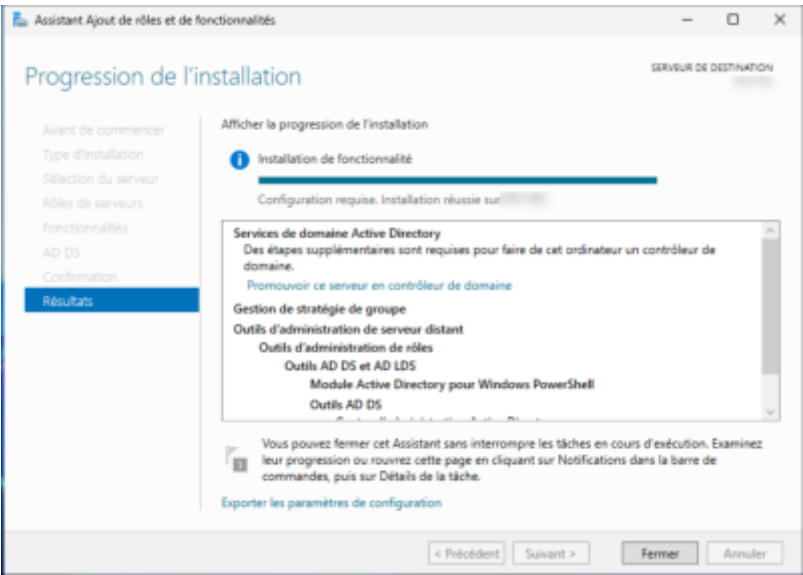

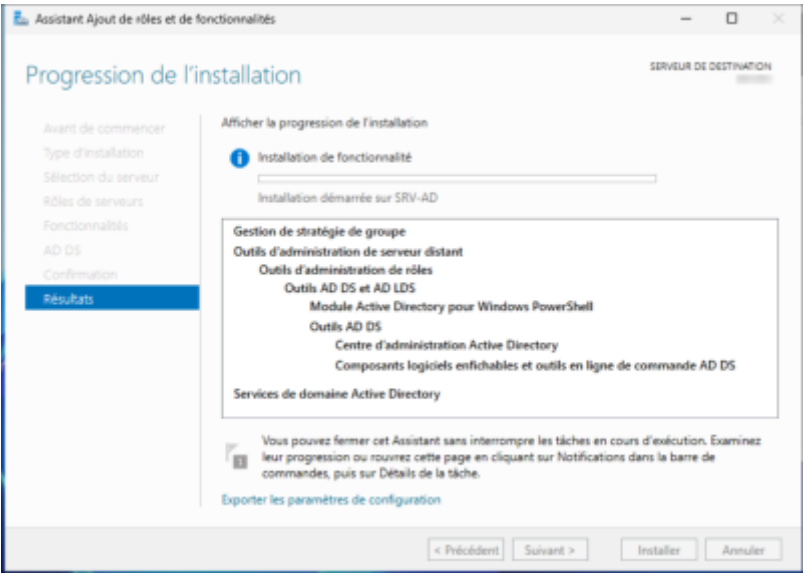

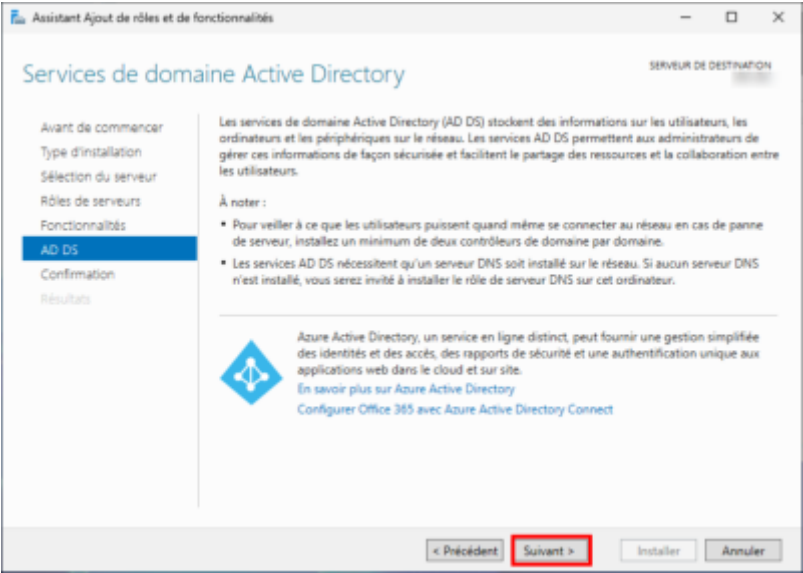

- Windows Server 2025 installé
- Deuxième disque dur pour la base de données AD (facultatif)
- IP statique configurer
- Nom de la machine serveur configurer

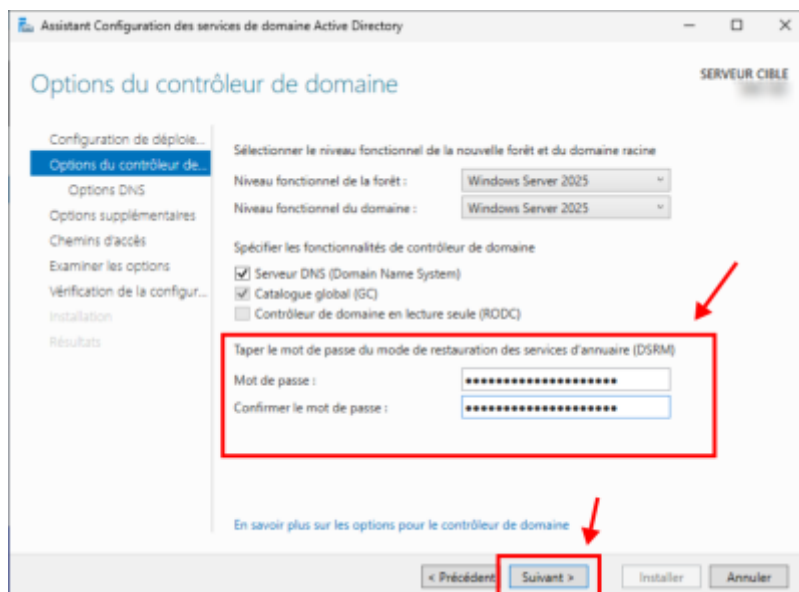

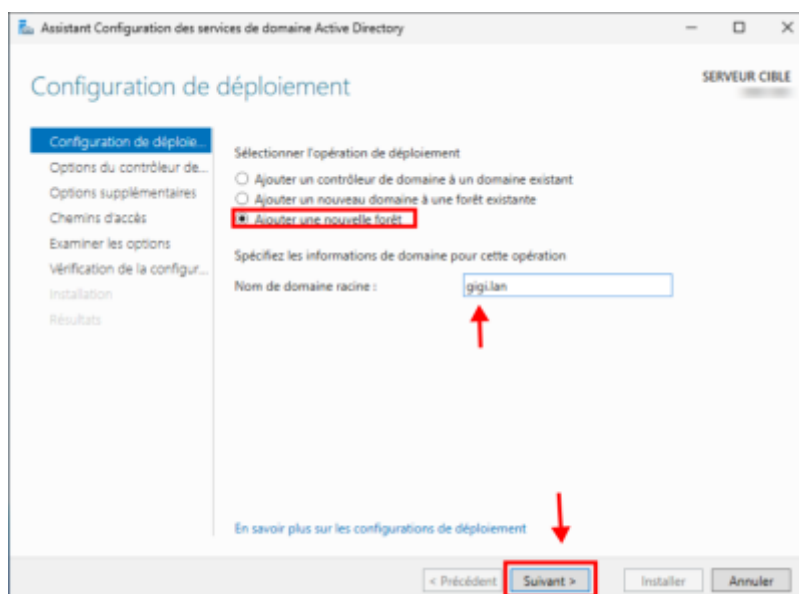

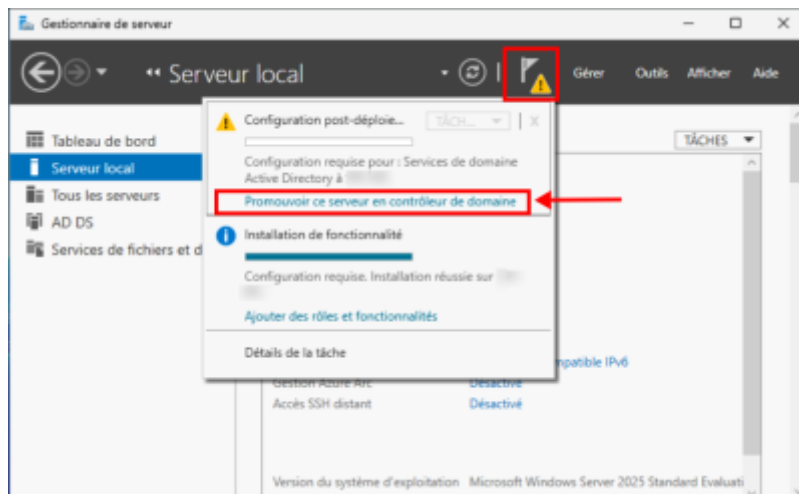

## Installation du service AD DS
